WASHINGTON, D. C., August 7, 1868.

Secession Meeting.

There was a grand Seymour ratification meeting at White Sulphur, Va., a few days since, presided over by General Thomas L. Price, of Missouri. About twenty ex-Confederate Generals were present. General Price spoke at considerable length. Concerning secession he said: "It is true you committed an error in the step you took to separate yourselves from the Union, but failing to accomplish that end, you were never out of the Union, and yet remain in the Union." Referring to the state of affairs in Missouri, he styled those in power "men who by the misfortunes of war have accidentally been thrown from obscurity into positions of power," and then continued: "These irresponsible scamps will take warning that forbearance ceases to be a virtue, and the free men of Missouri demand that this wholesale robbery shall stop, and men whose lives have been devoted to the best interests of our State, and who have committed no crime known to the laws to disqualify them from the exercise of the right of suffrage, shall have it." One of the resolutions passed was the following:

It is perfectly well known here and freely admitted by members of the President's political family, that he manifests no signs of enthusiasm for the Democratic ticket, but on the contrary causes his earnest supporters much anxiety on account of his coldness toward it.

THE CATTLE PLAGUE.

The Central Stock Yards Cleared of the Diseased Animals—Thirty-eight Head Killed Yesterday—Watering and Feeding Between Chicago and Pittsburgh—State of the Cattle Market—Professional Investigations of the Disease in Illinois—Interesting Report—The Flesh of the Diseased Animals not Detrimental to Health—The Disposition of the Offal—The Public Health Endangered, Etc.

The cattle disease, which has occupied so large a share of public attention during the past few days, is still anxiously discussed among all classes, and reliable information concerning it is eagerly sought for. In this city prompt and efficient means were taken to dispatch the diseased animals, as soon as the symptoms were sufficiently developed, and also to prevent the spread of the contagion to other herds. Yesterday Mr. Hoeck, the Meat Inspector, visited the Stock Yards at East Liberty, and killed the remainder of the eighteen car loads which had become diseased. Thirty-eight head were killed yesterday, and yesterday evening the yards were entirely cleared and renovated. One hundred and forty head were shipped East to Communipaw, near Jersey City, to a grease and bone boiler at that place, who paid $6 per head, while the price paid here was only $5 per head. These were shipped in separate cars, and the cars will not be used again for shipping cattle until thoroughly renovated, and until a sufficient time has elapsed to warrant their safe use for that purpose. Of the entire lot of eighteen cars, Mr. Horst owned forty-one head, of which eleven died and one was killed, the balance being sent East. Of the lot belonging to Mr. Alexander, two hundred and twenty-three were condemned, and but one hundred and forty sent East, the remainder either having died or been killed by order of the Meat Inspector. One lot belonging to Mr. D. Groff, passed on directly East, not having been reshipped at East Liberty, and the number is unknown, but it is reported that several had died before passing out of the Central Stock Yards. The lot of one hundred and forty head shipped to Communipaw, went by special train, and telegraphic advices and orders were sent ahead to all points, and to the yards at Jersey City.

The Mayor has stationed policemen at the East Liberty yards to see that none of the carcasses are disposed of for any other purpose than that of conversion into grease, &c., and a special policeman is stationed at the establishments where the rendering process is carried on. The disease, thus far, has not been developed among our native cattle: and it is safe to conclude that, unless we have fresh importations of affected stock, the danger of contagion has been averted. We do not entertain for one moment the idea that a single particle of the flesh of these animals can, either purposely or accidentally, find its way to the meat market. There is an extremely limited demand for cattle, and the best and most healthy stock is purchased very cautiously and scrutinizingly by our butchers. The consumption of meat has fallen off in a marked degree, not from any well grounded apprehensions that diseased meat might be offered in the market, but simply because the more fastidious of our flesh eaters became disgusted at the simple reading of the accounts in the papers. It was so with the consumption of pork, when the panic in regard to the trichina prevailed. The gorge rises at the bare thought at the possibility of eating unwholesome flesh, and the appetite for the most tempting roasts is gone. Numerous instances have been related to us, illustrative of this fact. One gentleman, residing in Allegheny, sat down to breakfast the other morning, and before him was a fine piece of steak, nicely cooked. But he had been reading the accounts in the papers descriptive of the Texas fever and was tempted to ask his wife from whom the meat had been purchased. She replied that it was bought from their regular butcher. He began to serve it, as usual, but one after another began to make excuses—didn't feel well, didn't care about meat, etc., until not a single one would partake. Even he, who had confidence enough to offer it to others, declined to eat any himself, and the steak remained untouched. The same abstemiousness was noticed at the restaurants, and the proprietor of one of our dining saloons was heard to remark that he had served twenty pounds per day less beef since the panic commenced. Confidence will soon be restored, however, and the savory roasts and juicy steaks will be in demand as before.

SHIPMENTS FROM CHICAGO—AN EXPLANATION.

In speaking of the shipments by rail from Chicago a day or two ago, we stated that "cattle were kept forty-eight hours without water," and that some of the drovers thought the crowding and thirst had a tendency to develop the disease. We are assured, upon reliable authority, that this statement is true only in exceptional cases. As a general rule, all cattle from Chicago are unloaded at Crestline, and fed and watered there, unless the owner is behind time and wants to make a market. These instances are said to be rare. The time from Chicago to Crestline is twenty-six hours, and from Crestline to East Liberty nineteen or twenty hours—thus making twenty-six hours the longest time that Chicago cattle are kept without water in reaching this point. This statement is due to the officers of the Pittsburgh, Fort Wayne and Chicago Railway Company, as well as to all other parties concerned in the shipment of cattle between the two points named.

Alleged Outrage in the Twelfth Ward.

On Thursday night two of the night police, while patroling their beat on the line of the Allegheny Valley Railroad, in the Twelfth ward, were met by a young man giving his name as G. Gaab, who related to them the following story: He stated that earlier in the evening he and a young lady named Lina Jones were out walking, and while passing along the bank of the Allegheny river, near Wilkins street, they were attacked by a crowd of rowdies, who had apparently been concealed behind a pile of lumber. Gaab was knocked down by one of the villians, and the rest, he states, dragged the girl away. He afterwards made search for his companion, but was unable to find her, and he desired the police to assist him. A thorough search of the locality where the outrage was committed was made by the police, but no traces of the assailants or the missing girl could be found. The police then accompanied the young man to the boarding house of Miss Jones, and were requested to remain outside until Gaab would go in and inquire if his companion had returned. He did not make his appearance again, and the police, supposing that he had found Miss Jones departed. Yesterday morning a rumor was current that the girl had not yet been heard from, and that the young man was suffering from the injuries he had received. Upon inquiry we learned that Miss Jones had returned to her boarding house on Thursday night, but we could ascertain no further particulars of the occurrence.

The Twenty-fourth Congressional District—A Nomination at Last.

The Conferees of the Twenty-fourth Congressional District met at nine o'clock yesterday morning at the Monongahela House, and balloted until about noon. Captain J. B. Donley, of Greene county, received a majority, and his nomination was immediately made unanimous. The Conference has been in session altogether about twelve days, and about three hundred ballots have been had.

A New Era in Pittsburgh Trade—Boyts & Ogden's Queensware Jobbing House—A Mammoth Establishment—Queensware at Eastern Prices.

We take pleasure in directing the attention of the public to a new enterprize in the queensware trade, which bids fair to entirely revolutionize the jobbing business in that important line. Messrs. Boyts & Ogden, well known business men of this city, and heretofore extensively engaged in the lamp trade, at No. 23 Wood street, have largely increased their facilities, and made preparations for opening the most extensive stock of queensware ever brought to this city. Their spacious warehouse is now packed with goods embracing every description of queensware, imported directly from Europe, and they have obtained rooms in adjoining houses for storing other goods that are now on the way. They have some three hundred crates in store and to arrive, and are prepared to offer the most liberal inducements to the trade.

The small dealers in queensware in Western Pennsylvania and Eastern Ohio have heretofore been compelled to make their purchases at New York, Philadelphia, Buffalo, Cleveland, and other points, because the merchants in those places were able to undersell those in the business here. To supply the want, and to give those who purchase in small lots a chance to have their orders filled in Pittsburgh, Messrs. Boyts & Ogden have invested an ample capital, and now invite dealers, accessible to this market, to call and examine their goods, ascertain their prices, etc. They are now prepared to fill all orders, in their line of goods, at New York jobbing rates. They guarantee to sell as cheap as any importer in New York, Philadelphia, Buffalo or Cleveland. They will duplicate any orders which may have been filled by any house in the cities named, and will give as good if not a better article for the same money. This is certainly all that any retail dealer could ask, because, in making his purchases here he can save the time and money which he would spend in traveling, and also save the freight from those distant points. This is a very important matter, and one which cannot fail to recommend itself to the attention of shrewd business men. The goods offered by this firm have been selected in the European markets by a member of the firm: and are warranted first class in every respect. Dealers have but to examine the stock to be fully satisfied on this point. Their purpose is to offer the same facilities in Pittsburgh which are extended to the trade by the jobbing houses of the eastern cities, and hence their willingness to fill all orders at eastern rates. This will make a new era in this branch of business in the Iron City, and the enterprising gentlemen composing the firm will doubtless soon build up a very large and lucrative business—one which will prove mutually advantageous to the public and themselves. Those who have heretofore made their purchases of queensware in the east or on the Lake shore, at considerable disadvantage, need do so no longer, as Messrs. Boyts & Ogden are prepared to satisfy them, by ocular demonstration, that they can save both time and money by buying their goods here. We took a walk through their warehouse yesterday, and were surprised at the immense quantities of goods of every description there deposited. It has often been asked, "what becomes of all the pins?" but after going through such huge piles of queensware we might be tempted to inquire, "what becomes of all the dishes?" The prices, too, struck us as extremely low. Although we have some little knowledge of the business, it is puzzling to understand how a set of cups and saucers can be sold for twenty five cents! Dealers who wish to become acquainted with the jobbing rates of the firm should call at once and procure a price list, or address the firm by mail.

We may state that, in addition to the queensware business, the house is still largely engaged in the sale of lamps, burners, &c., of every description, having one of the largest stocks to be found in the city. They sell at very low rates, and are prepared to fill orders on the most favorable terms.

Their stock of glassware is also very large and choice, and they sell goods in this line as cheap as they can be had elsewhere in the city.

In a word, they are determined to offer such inducements as cannot fail to secure the attention of customers, and those who purchase in lots will most assuredly consult their own interests by examining these goods before entrusting their orders to other hands. We commend the firm to the patronage of our readers, and cannot but express the hope that they will realize such a return as will be commensurate with their liberality and enterprize. Remember the place—No. 23 Wood street, near the Monongahela wharf.

Prices of Wheat and Flour.

On our fourth page will be found T. C. Jenkin's reply to the article of Kennedy & Bro., in the present and probable price, quantity and quality of wheat and flour for the coming year. Farmers, dealers and consumers will all be interested. While this thing is going on there will be some cheap flour furnished. Mr. Jenkins predicts that flour and wheat will rule high for the coming year.

New and Scientific Treatment.

The most recent and best approved scientific modes of treatment for all diseases of the eye, ear, throat and chest, including chronic catarrh, are skillfully used by Dr. E. S. Aborn, at his Medical and Surgical Rooms, 134 Smithfield street. Testimonials without number from influential and well known citizens attest the accuracy of the Dr.'s judgment and his skill in treatment.

Throat Disease Cured by Medicated Inhalation.

Under Dr. Aborn's treatment by medicated inhalation I have entirely recovered from a chronic disease of the throat and lungs, and cheerfully recommend Dr. Aborn's treatment to the afflicted.

JAMES R. MCCADE,
Jefferson county, Pa.

A Cure for Deafness.

After long suffering from deafness, I applied to Dr. Aborn and I believe he has permanently effected a cure after a few applications. To persons troubled with diseases of the Ear, I heartily recommend Dr. Aborn, of 134 Smithfield street.

HENRY JONES,
39 Ohio street, Allegheny.

I, SYLVANUS J. ZENTZ, suffered with a sore eye for twelve years. I applied to Dr. Aborn, and in a few days was restored to sight.

S. J. ZENTZ,
Forest County, Pa.

Deafness has been increasing on me for the last ten years, so that I could not hear a clock tick. I applied to Dr. Aborn, 134 Smithfield street, and after eight days' treatment I can now hear a watch tick distinctly, and am still improving.

ALANSON SCOFIELD,
Brockwayville, Jefferson county, Pa.

NOTE.—Dr. Aborn successfully treats by his new method, chronic catarrh of the head and the various diseases of the eye, ear, head, throat and lungs. Medical and Surgical Rooms, 134 Smithfield street.

The Curability of Chronic Catarrh

Is daily demonstrated by the new treatment of Dr. Aborn, at 134 Smithfield street. No charge for consultation.

The Daily Commercial

SATURDAY, AUGUST 8, 1868.

THE COMMERCIAL is the largest daily paper in the State, and has daily one-fourth more reading than any other paper in Pittsburgh. It is the only Pittsburgh paper that uses the telegraph liberally, gives full market reports, and all the news of the day.

As proof of the estimate placed on the market reports of the COMMERCIAL, we will state that they are regularly copied by the New York Economist, Shipping List, Iron Age, and other papers of the character in that and other cities, and that leading English commercial papers and circulars regularly reprint them with credit. There is neither Ironmaker, hardly an Iron Factory, Oil Refinery, or leading manufactory of any kind that is not a subscriber to the COMMERCIAL, principally, because its reports are the only full and reliable given of the Pittsburgh markets.

GOOD hints for political campaigners are conveyed in the warnings, "You must not take things for granted," "Politics are like business; a man must work to succeed." It will not do to take it for granted that GRANT and COLFAX will be elected. We may feel sure they will be, but let us work to make it a certain success. It will not do to fold our arms and calculate majorities; we must work to gain them. Work is the secret of success; therefore, relax no effort. But work with a will and a purpose.

EVERY steamer is bringing private letters from abroad stating that a growing alarm prevails among the holders of American securities, in consequence of the scarcely disguised repudiation, advocated by the Democrats. One says: "Confidence is rapidly failing. Shall I sell? You are on the spot, give me your advice." The alarm is threatening to our credit, and strikes at the most vital interest of the country. Nothing will save us from the worst of consequences but a general uprising in favor of GRANT and COLFAX.

IT is understood that active measures have been taken by SEYMOUR's friends—not the sinners—but Democratic leaders in the North—to silence HAMPTON, COBB, SEMMES & Co., whose speeches have fatally disclosed the bargain entered into in Tammany Hall. Throughout the North the speeches of these rebels and pirates have sent dismay through the party ranks, and it is said agents have been dispatched to the Southern leaders to induce them to "hold up." But the steps have been taken too late, even though they are successful. Words spoken cannot be recalled.

THE reader has been told that FERNANDO WOOD has withdrawn from the Mozart organization in New York, for the sake of harmonious action in a great emergency. His letter reads very like the farewell address of a culprit just before he is swung off. We quote the following specimen:

> [illegible]

This is doleful enough, and leaves on the mind the impression that some calamity or other is going to happen to the writer. Evidently FERNANDO was "imbued with the conviction" that they are bound to go to the bottom, and that it would be simply decent to prepare to go together.

THERE are indications of a stampede from the Tammany ticket by those Democrats who have a stake in the country. The New York *Journal of Commerce*, which speaks the minds of the solid men of the party, gives up the contest, and says the action of the Tammany Convention forfeited the support of the honest portion of the party. Had "two good Conservative Democrats" been presented, it says, "the ticket could have been elected by an overwhelming majority." As it is, however, there is no hope. We quote:

> [illegible]

The Democratic journal could not have employed language better to indicate its belief that the election of GRANT and COLFAX is already placed beyond a question.

THE political position of Mr. ADAMS, late Minister to England, who is spoken of for the United States Senate as the successor of Mr. SUMNER, is considerably discussed. There remains, however, so far as public declarations go, considerable ambiguity on the subject, which the Boston correspondent of the New York *Evening Post* does not assist to dispel. We quote from him as follows:

> [illegible]

If the writer meant to say that Mr. ADAMS is for GRANT and opposed to SEYMOUR, why did he not say so? He evidently means to convey such an impression. Mr. ADAMS will naturally support GRANT, whose moderation and soundness at once incline men like him to confide in GRANT. It is because as President he will be firm, conservative, thorough, capable and honest, that on the issue presented by the Tammany Convention his election is already beyond a question.

INSULTING THE GOSPEL.

VALLANDIGHAM was not to be outdone by the Hon. SUNSET COX in endeavoring to make the Democratic platform true Christianity. In a recent speech at Cincinnati VALLANDIGHAM said, "there was more of the benign spirit of Christ expressed in the action of the New York National Convention than in all the loyal pulpits of the United States in five years." [illegible] We want to have some [illegible] pointed out of the benignity. Are those scenes in Louisiana part of [illegible]? Is the [illegible] one of the evidences? Is lynching [illegible] murder and stealing Christian excellence? It may be that [illegible] Christian Democratic excellency of that they are guilty when they tolerate any repudiation ideas. At any rate it is time what the benignity consists of was known. In vain has search been made to discover it. The next proposition may be to get Democratic stumpers in the pulpit to declare that this is a white man's government; that the Kingdom of Heaven is only for the whites, and that such ribald balderdash as some of the Democratic journals indulge in, is the New Testament of a benign Christianity.

The Hon. SUNSET COX must look to his laurels. Either he stole the idea from VALLANDIGHAM or VALLANDIGHAM committed the theft from the Hon. SUNSET COX. Democrats do echo each other considerably, and when a new expression is used, it goes the rounds. It is very convenient to attempt to make the Great Teacher into a modern Copperhead, more especially when He taught freedom for all—a truth the Democrats are too blind to comprehend.

THE OLD ISSUE REVIVED.

There is no escaping it. The Tammany Convention might have nominated a ticket and framed a platform that War Democrats could have consistently supported; for instance, HANCOCK and HENDRICKS. But the essential unsoundness of the party on the questions involved in the war rendered this impossible. Good cannot come of evil. Acquiescence in the verdict of the war was not to be. The reversal of the verdict was the prominent idea of the Convention. A ticket and platform in harmony with it was the necessary result. The moment it was declared the issue of 1861 was revived. Not all the sophistry of a thousand SEYMOURS can make it appear otherwise. Were it not so the Tammany ticket would be without votes in the South, where the old rebel spirit has received new life. We gather the truth on this point from many things happening in that quarter. The rebel leaders, who were in the Convention and who, as WADE HAMPTON plainly assures us, were received with open arms, and promised everything the South could ask, go before the people with no other argument than that the Constitution will be "restored as it was before the war." In this way the Southern heart has been fired anew. As the necessary consequence, in Louisiana terrorism reigns, and a new rebellion is being openly organized. Rebels everywhere have been brought to the front. There is no limit to their confidence. The Democratic leaders and orators in the North do not pretend to dispute that the platform means the restoration of the old order of things. FRANK BLAIR's letter and WADE HAMPTON's speeches are everywhere accepted as the only true interpretation. No Democrat—no man—who reads can pretend to deny that the question before the country is: *"Shall the verdict of the war stand?"* This is no perverted view of the canvass. Recurring to the speeches of the foremost men on the stump in the South for SEYMOUR and BLAIR, we find the proof. Among the Southern leaders there is not one better authorized to speak than HOWELL COBB. What does he say? In a recent speech he used these words:

> "Come one and all, and let us march the old banner from the dust, give it again to the breeze, and, if needs be, to the God of battles, and strike one more honest blow for constitutional liberty. [illegible]"

Was there at any time during the war made to the Southern people an appeal in behalf of the rebel cause more direct, more hostile to the country, more determined than this? It might have been made just as well in front of the rebel army as at a public meeting. No man will pretend that HOWELL COBB and those whom he addresses in 1868 are not animated by a spirit identical with that which carried them into the Rebellion in 1861. That there be no mistake we quote again from his speech as follows:

> [illegible]

Now if this means not another rebellion—a deliberate purpose to contest the conflict of the war—we ask what does it mean? At the very least, does it not mean danger to the best interests of the country? COBB is not alone. In every Southern neighborhood speeches like the one from which we have quoted, only more violent, are made to jubilant crowds, who mingle with cheers for the orator shouts for SEYMOUR and BLAIR. Now we ask, is there not deep meaning to this? Is there no significance in the fact that the Governor of the State of Louisiana has been compelled to ask for Federal troops to protect Union men? We say Union men, because there is no pretence that any but Union men require protection. If so soon after the nomination these things happen, what may we look for when SEYMOUR and BLAIR are elected? Is not the old issue revived?

REBELS TO THE FRONT.

The rebel Democracy in the South are inclined to resent the demand of the Democratic press in the North for a more moderate tone and that the prominent rebel leaders for the sake of prudence be kept somewhat in the background. The Charleston *Mercury* expresses itself as follows:

> [illegible]

The Mobile *Register*, whose editor—JOHN FORSYTH—was a delegate to the Tammany Convention, speaks its mind after the following fashion:

> [illegible]

The Democracy of the North will therefore take notice, that the rebel leaders having taken the lead intend to keep it, let the consequences be what they will. The *Register* referring to the cordiality with which HAMPTON, FORREST and other rebels were received, goes on to say:

> [illegible]

It is entirely evident that Democrats must either follow or break loose altogether from the association into which they have been forced with the rebel leaders, who flatter themselves that by electing SEYMOUR and BLAIR, or VANCE, of North Carolina, [illegible], they will win all they fought for.

General Seymour.

The Bedford *Inquirer* of yesterday in noticing the fact that General T. Truman Seymour, of this city, intends to support his old leader, General Grant, says:

> [illegible]

SEYMOUR is reported to have said that if he owned two lots, one in Louisiana the other in hell, and was compelled to choose on which he would live, he thought that unless the rebel spirit was broken in Louisiana he would sell out there and emigrate to the other place. We don't suppose that the story is true, but that Horatio may have said something like it, in view of the late news from Louisiana, we are quite ready to believe.

The Twentieth Congressional District.

Late intelligence from the Twentieth Congressional District indicates much dissatisfaction with the action of the Conference in nominating a man for whom the people of neither county instructed. There were four candidates before the Conference for whom the Republican voters of the district had instructed their delegates—S. N. Pettis, of Crawford; W. T. McAdam, of Mercer; Mr. Glidden, of Venango, and G. W. Lathe, of Clarion. After balloting ineffectually nearly two hundred times, a delegate from Venango proposed the name of H. C. Johnson, of Crawford, and he was nominated by a vote of eight against four. This action of the Conference does not meet the approval of the Soldiers' Loyal League of Meadville, who, on Saturday evening last, adopted a series of resolutions "absolutely and utterly" repudiating it, and calling upon the County Republican Committee "to appoint new conferees, with the other counties in the district, with the distinct understanding that a choice be made from the candidates who have received the support of their respective conferees." The Republican County Committee of Mercer, at a meeting on the 4th inst., adopted similar resolutions, refusing to be bound by the action of the conference, and calling upon the other counties to appoint new conferees. They claim that the precedent established by the late conference, if permitted to stand, will work discord in the party, and prevent good men from allowing their names to go before the people as candidates, as they will have "no assurance that their claims as set forth by the people will not at any moment be set aside by connivance of scheming tricksters who manifest more regard for their own selfish interests than for the success of the party."

A New Feature in the Eight Hour Law.

The first to complain of the operations of the eight hour law are the Government operatives. Yesterday we called attention to a complaint from Rock Island. To-day we report a complaint from Maine. The workmen employed on a Government building in that State, requested that they might be allowed to work ten hours and receive extra pay. The message in reply from Washington contains a little good natured satire. It says the men must not be permitted to overwork themselves; that the law was passed for the benefit of the workingmen, who said that eight hours' work was enough for any man, and that as much work could be done in eight as in ten hours; they must not therefore work more than eight hours for the eight hours' pay, as their physical health must not be tampered with. The men replied that as the work was wanted they saw no harm in the extra work. The Superintendent has suggested a double set of eight hour men. One set to work from four o'clock in the morning until noon, the other from noon until eight o'clock at night. The Washington officer replied that no objection existed to the doubling and divided plan.

The Superintendent of the works is a bit of a wag. When he received orders that the health of the men employed must on no account be allowed to suffer, he suggested the employment of a medical officer at the works, who should "spot on the physical endurance of the men." The Department at Washington could not see it in that light, and for the present the old interpretation of eight hours' pay for eight hours' work remains, with the introduction of the new feature of two sets of men and division of time.

Popularizing Stump Speaking.

Professor M. C. Tyler, in the *Independent*, argues in favor of making stump speaking respectable. He regards a Presidential campaign with interest chiefly because it affords a spacious and a noble opportunity for the direct education of the people in such habits of correct political thinking as will lead to the formation of correct political principles. The writer speaks truly when he says "stump speaking is too often considered as a frivolous and a mercenary practice, and abandoned to college boys, briefless barristers and political hacks. The speeches, also, are too frequently the vehicles for the conveyance of buncombe, low jests, anecdotal drivel, and unredeemed personality and partisanship. This should not continue." He therefore thinks that the very best classes of professional men—clergymen, lawyers, editors, merchants, teachers—should be willing to surrender a few weeks every four years to aid in the political education of their fellow-countrymen. It is observed truly that nothing is so fascinating to an audience as real thought. Many speakers make a fatal mistake in supposing that they need to talk down to the people. Theodore Parker said that he once made that mistake, but that he found that the people could receive the best which he could give.

Cheaper Bread.

The harvest has progressed so far and so favorably that we may confidently expect cheaper bread very soon, with the attendant benefits to every class of consumers. Not only is the present crop of cereals a good one in quality, says the New York *Bulletin*, "but the large profits realized from the production of grain in the past three years has had the usual effect of largely increasing the amount of land cultivated. We will now find ourselves at that period of the flux in the breadstuffs trade, when the wave of high prices having swelled to the highest point, a reaction caused by over production has commenced, and prices will very probably go down to a point below their actual value." It is estimated that the yield of corn over 1868 will be over three hundred and sixty million bushels, with more than $750,000,000 more than the products of any one year.

Twenty-fourth Congressional District.

The Republican Conference of the Twenty-fourth District, after a long continued but good natured contest, yesterday nominated Captain J. B. Donley, of Greene county, for Congress. Captain Donley served with credit in the Union army, is at present Register in Bankruptcy for the Twenty-fourth District, and is a talented member of the Bar. He votes as he fought, and is therefore a staunch Republican. His Democratic opponent is David Crawford, also of Greene county, so that the contest will be an interesting one, at least in that neighborhood. As Greene is one of the darkly Democratic counties of the State, it is not saying too much to argue that Captain Donley will reduce the majority very materially.

The Outlook.

From every quarter of the country we have encouraging reports. As a general thing they represent that the manner in which the South receives the nomination of Blair reveals the malignant programme of fresh disturbance and anarchy, and will induce thousands of honest men, who intended to vote the conservative ticket, to go with the Republicans for the sake of interests that lie far beyond the range of party politics. The mistakes of Republicans, which in ordinary times might have rallied a powerful opposition, will be overlooked in the terrible issues that are involved in the coming election.

SHOULD not military power be under the command of the Government? It would not seem so, to read the letter of Seymour. He says that Congress has allied itself to the military power. To what other authority should military power be allied in this country? It is no new feature in legislation for such a course to be pursued, and it has been reserved for Seymour to find out the apparent query. If Mr. Seymour was elected President, which Heaven forbid, he would like the military power allied to himself. If that were so, there would be a revolution before many days, for after his letter of acceptance who can doubt he will be using armed force to overthrow Congress?

[illegible] in the country is now an draw-back to a Parisian. Velocipedes have come into common use and are all the rage. A business man, when he has closed his store in Paris, mounts his velocipede and goes out to his country residence, ten or twelve miles, in a very short time. There is also a water velocipede, that enables a man to go fishing or travel swiftly on the water, without so much danger of upsetting as in the use of a boat. The velocipede for land is the result of the invention last year in the Exposition, and some inclined to work a revolution in travel, providing there are tolerably smooth roads and fine weather.

THE Nashville *Press and Times* puts a different construction on the Fenian meeting at Buffalo, to say that has previously been made public. The movement on Canada is to take place this month. "All those not immediately situated in the Eastern States and New York, east of Elmira and Oswego, will congregate on the Niagara river, about 15,000 men. The remainder will be congregated near Ogdensburg—about 18,000 men. The concentration of the troops will be effected with the utmost rapidity and the invasion effected from these two points. The final preparations are now being made all over the States."

MR. WARD writes that the harvest in England is "progressing prematurely without the usual apprehension of unfavorable weather." He says: "Our previous knowledge of England precluded the idea of parched fields, withered foliage, burnt herbs, and yet all these exist, as we have so often seen at home."

WHEN the Mormons first emigrated it is said they took sun flower seed with them. That is how the great growth of sunflowers, for a thousand miles along the Missouri bottom, is accounted for.

Mr. Hill, the New Georgia Senator.

Whatever hopes the Georgia Democrats may have entertained through the election of Mr. Hill must have vanished when they heard the speech he was called out to make in Atlanta. If the Democrats elected him by their votes, and it is acknowledged they helped to do so, they conferred honor on a good Union man who said, when the Democrats sought to extract promises from him, "Gentlemen, if my principles are to be the subject of discussion, this interview must close at once; they are my property and not for sale." He also asked: "Does any one suppose that I would sacrifice the record of my whole political life to get Democratic votes, even to put me in the United States Senate?"

Mr. Hill spoke of Grant and Colfax in the highest terms, and recommended them as the chosen candidates of the Republican party. He set forth General Grant's modesty, taciturnity, clearness of judgment, and promptness of decision. Mr. Hill spoke of Blair as impetuous and imprudent. Of his own position Mr. Hill spoke with modesty, saying "I do not regard myself as possessing the qualities necessary for a President of the United States. I could not stand up all day, receive and dismiss three hundred visitors with a word to each one, but Grant can."

That boastful tone Democrats assumed when Mr. Hill was elected, has cooled considerably down. They helped to elect Mr. Hill because they hated Mr. Joseph E. Brown, and Republicans are well satisfied with the choice made.

The Monthly Line of Steamers to China.

The departure of the first of the monthly line of steamers for China from California, last Monday, was an event on which America may look with pride. This is only the commencement of a new and extended system of commerce, which must be fraught with blessings to both nations. We should predict that the arrivals of celestials in California will henceforth be very large. They appear thoroughly possessed with a roving spirit, but like to rest in death in Flowery Land.

This is not surprising when it is known how little it takes to keep a celestial in China. A few years successful toil in California or Australia, and the Chinaman is "right" for the remaining portion of his days.

Several representative men were on board the steamer that left on Monday, amongst whom was Mr. Browne, the American Minister. The establishment of this line will cause considerable jealousy in London, where the merchants consider they have a prior claim on the China trade, just as they thought of India. It is not difficult to see that in a few years, at most, European merchants will have to choose the route via New York and California, as the readiest and quickest way of doing business with China; and now that the monthly line of steamers is an accomplished fact, we may patiently wait results.

MR. GLADSTONE is arraigned at the bar of public opinion in England concerning his connection with a demagogue named Finlen, who says he acted under the sanction of the Ex-Chancellor of the Exchequer in holding the meeting in Hyde Park on the Sunday, to which we called attention some time since. Finlen don't stand well with his brother stumpers, and visits have been made to his house to see in what kind of quarters the man lived who was Gladstone's pet in leading the mob. Report says that Finlen's home was found in a wretched condition; his wife and children neglected; and it is asked if men will not take care of their own homes, how are they fitted to reform the nation? Mr. Gladstone has been charged in the House of Commons with talking with Finlen and he has not denied it. The Tories are in high delight at Gladstone's perplexity respecting the interview, and openly charge him with willingness to resort to any scheme to regain power. Such are the amenities of English politics. Mr. Disraeli in writing to a friend said "They were threatened with a thunder storm, but since the estimates were passed it was only sheet lightning." The professedly moral Parliament is considerably spiced with malice and slang.

JOHN BRIGHT, in the speech at the banquet given to him in Limerick, said that every nation in Europe, including Ireland, had a right to desire independence, and that a Parliament, that entered into Union could also repeal it. No further did he commit himself. Mr. Bright did not say that Ireland ought to be an independent nation, but guarding himself consistently with his advocacy of the rights of Reform, gave his enemies no opportunity of saying that he had stepped into the shoes of the late Daniel O'Connell. There never was a more difficult task committed to a man occupying the prominent position that John Bright does, than visiting a country where so lately the fires of civil discord existed; and his actions and words under the trying ordeal show that the Reform party in England has a leader of whom it may justly be proud.

SENATOR MORTON, in his speech at Indianapolis, presented a vivid picture of what would result from Democratic rule. Apart from the threats of revolution and a return to slavery, the view he takes of the Democratic position is an important one. The Democrats who brought on the war, sympathized with the rebels and did all they could to disgrace the North, would as early as they had power, elevate the Southern soldier to the same level as the Union hero. They would pension them as the soldiers of the North are pensioned, holding that those who lost health and limbs in the Southern service are equally entitled to support with Northern soldiers. And this would be but a step in the direction of acknowledgment of the Southern debt, so that Democratic victory would mean increase of troubles on every hand and destruction of the nation.

LAWRENCE STERNE said "they manage things better in France." Travelers may well ask how it is that they managed better? Something, however, now comes from that country. A man has invented a tube for the dead, to run from the mouth of the body up to near the tombstone. A Frenchman has a mortal dread of being buried alive. Those who have read Edgar A. Poe will remember his fantastic sketch of the coffin for a catalepic, provided with cushions and spring boards. The idea was novel, but lacked the Frenchman's invention, a tube to communicate with the living. The Berlin correspondent who conveys the news, says, that if the tubes come into general use, the keeper of a cemetery may be kept receiving messages to inform friends that supposed dead people have waked up again to life.

THE speech of Baron Von Beust is pacific. Austria, with the memory of Sadowa, has had sufficient to deter her from interfering further with the affairs of Germany. Speeches do not always indicate intentions, but for Austria there is nothing but further dismemberment if she should early engage in war. The sinews of war would trouble her more than to raise men. She has little money; her credit is bad, and peace is her only salvation. She has to war against ignorance and superstition in her own dominions; and as her people grow in knowledge war will be less likely to engage her attention. When she failed to keep faith with her creditors she placed herself in a difficult position ever to resort to war. Soldiers cannot fight without support, and who would be willing now to invest in Austrian bonds?

THE Captain of the Chanticleer, who committed the insult on Mexico, by threatening to bombard Mazatlan, after it had been clearly proved that he was wrong, will feel shorn in his coats when he reads the remarks of the London *Times* on his conduct. That [illegible] commander is informed he should not have resorted to hostilities, but have sought the action of his government. That was due even to Spanish America. As the *Times* generally, on foreign matters, shadows the policy of the government, the Mexican difficulty with England will be toned down into mutual apologies, in which the Captain of the Chanticleer will feel small. His only consolation is that Mexico is called one of the "United States."

THE Boston *Telegraph* is responsible for the following: A gentleman residing in this city, a few days since called in the services of a homœopathic physician, who left medicine to be taken by the teaspoonful once in three hours. During the night the invalid awoke, and requested his wife to give him a drink of water. She passed him a tumbler, and he speedily swallowed its contents to his stomach. Subsequently she ascertained that she had given him the medicine, and the doctor was sent for amidst much excitement. After being informed of the circumstances, he coolly replied that he would "send some more in the morning," which at once satisfied the friends of the invalid that he was in no immediate danger.

A party has started from Grand Haven, Michigan, to inflict vengeance on two white men, if they can catch them, who violated an Indian woman, having knocked her down with a sling shot. They killed her little papoose. The party is made up of Indians and white men, who vow they will not halt in their search until they have inflicted vengeance.

AT Cornish Flat, New York, recently, a streak of lightning ran down a tree and went into the earth, tearing open a hole from which a stream of water has continually bubbled ever since. The stream runs from a place hitherto dry, and near which no water was supposed to exist.

GENERAL AND PARTICULAR.

An old and rich planter, who had once $80,000 deposited in gold in a bank in New Orleans, and a plantation as large as a German principality, now sleeps at the Police Station in that city. He went to Europe before the war, and, previous to leaving, made a will in favor of his children, so that there should be no trouble in case of his death. The children took possession of the property and now refuse to recognize the old man or to allow him any money. He has taken refuge at the Police Station pending legal proceedings.

A Yankee lawyer, who was pleading the cause of a little boy, took him up in his arms, and held him up to the jury, suffused in tears. This had a great effect until the opposite lawyer asked of the boy, "What makes you cry?" "He's pinching me," said the boy.

The great water snake at Willoughby Lake, New Hampshire, the existence of which has been recently denied, was killed, on Wednesday of last week, by Stephen Edmonds, of Newport, a lad of twelve years. Rushing boldly upon the monster, he severed its body with a sickle. On actual measurement the two pieces were found to be twenty-three feet in length.

Fifteen Japanese youths, sons of princes and men of high position, have for some time past been working hard for a Massachusetts education, nine of them being under private tuition in Boston, five at Monson Academy, and one at Amherst College. Two leave for home this week, in consequence of the war in their own country. They could speak but a few words of English six months ago, but can now read and converse intelligibly, and they have made rapid progress in their knowledge of our institutions and the Christian religion.

The collection in the various Roman Catholic churches in New York and immediate neighborhood, on Sunday, June 7th, in aid of the Pope of Rome, amounted in the aggregate to $27,561 30. The heaviest contribution, made by St. Francis Xavier's, was $1,687 60; the next $1,100 62 by St. Andrew's, and the next, $1,000 by St. Paul's; St. Patrick's Cathedral gave $927 50. The smallest donation was $25, by the Convent of the Good Shepherd.

Advices from the Cape of Good Hope tend to confirm the report recently received with regard to gold discoveries beyond the Transvaal Republic. Some of the accounts in circulation are of the wildest description, but setting these aside there is reason to believe, not only that deposits exist, but that they are very rich and extensive. They appear to be situated about five hundred miles from Potchefstroom, a town on the Southern border of the Transvaal, and the route is reported to be healthy and abounding in game—wild geese perhaps.

Berlin contains a population of about 700,000.

Bishop Colenso is about to visit Natal. He will take with him a Lancashire clergyman, who is to be consecrated Bishop of Natal by the South African Bishops. The salary will be paid to Colenso. The Lancashire clergyman takes the chance of being sustained in his title. When Bishops disagree who shall decide?

A wealthy and respectable man in New York has died from the effects of strychnine administered in a seidlitz powder. The jury have exonerated the druggist who sold the powder, and the man servant says he gave it into the hands of the wife as he received it. The wife and husband were on good terms, and how the poison got into the powder is at present a mystery. The man was anxious to live, and the wife says he had everything to live for, as he was wealthy and apparently happy.

Eight large sized falling meteors, or meteoric stones, discovered and unearthed among the mountains of Mexico, by Dr. Henry B. Butcher, of Philadelphia, have been consigned to the Academy of Natural Sciences in that city. On their arrival in New York from Mexico, they were examined by a number of scientific gentlemen and pronounced genuine specimens.

A traveler who has passed through Michigan writes to the Brooklyn *Eagle* that he is surprised at the development and riches of the State.

The sugar crop in the West Indies promises to be a very large one this year.

PERSONAL.

—Senator Morton has gone to St. Catherines, C. W., to be absent till about the first of September.

—Hon. Thomas L. Price, who presided most of the time over the late National Democratic Convention at New York, has gone, in bad health, to the Springs in Virginia. Recent letters say that he cannot live long. He is a man of immense fortune, being one of the largest stockholders in the Union Pacific railroad.

—Ole Bull had a grand reception from his fellow citizens at Valestrand, Norway, on the first of July. He will return to the United States in the fall.

—A St. Louis letter to the Boston *Traveller*, gives the following concerning General Grant: "I met him the other day in the city. He was superintending, in his own quiet way, the loading of a couple of wagons with trunks to go out into the country, where his family were to spend the summer. And I remarked to him that he seemed to have some trouble with those trunks, and that Sherman didn't take much baggage on his march. In a very quiet way he said: 'I have moved an army, and I have moved a family, and of the two, it is easier to move the army.' Just then I received by express at the Planter's House, some bottles of the famous Saratoga Sulphur Spring water, and the General drank of it with us as we were testing its merits with that of the Blue Lick of Kentucky. And I expect some mean sneak of a scribbler from New York may have stood by to jot down an item about the drinking of our future President."

—M. De Rochefort, the editor of the Paris *Lanterne*, receives $2,500 weekly for writing three columns of original matter.

—Observance of etiquette is sometimes attended with serious results. The French Emperor and Empress lately stopped in the garden of Fontainebleau to speak with one of the head workmen. Court etiquette obliged him to stand uncovered. He was sunstruck in consequence and has died.

—M. de Charette, the commander of the Pontifical Zouaves, has had a miff with General Kanzler of the Papal War Department, and has resigned. The Pope's war minister hates all Frenchmen, but M. de Charette and M. de Becdelievre, a former commander, especially.

POLITICAL.

The Republicans of Chicago will hold a grand mass meeting on the 12th. In addition to Gen. Palmer, Gen. Logan and Gov. Gillespie, it is expected that Hon. Edmund M. Stanton, late Secretary of War, will be present and address the meeting.

The Buffalo *Commercial*, speaking of Horatio Seymour, says: "The late Dean Richmond, the Warwick of the Democracy in this State, thoroughly disliked him, couldn't speak of him without evincing a sturdy disgust for the two faced demagogue. 'He's a humbug, boys, a d——d humbug,' the Dean was wont to say, when talking with those who possessed his confidence. 'Don't bet your money on him, boys,' says Richmond, to his Central Railroad army, in the campaign four years ago, in which Seymour was defeated and ran largely behind his ticket."

Here is a new song to an old measure:

General Blair came to town
Riding a [illegible]
[illegible]
[illegible]
General Blair! ha! ha! ha!
[illegible]
[illegible]
No better than our Andy.

Tom Florence and the Kitchen Cabinet at Washington are terribly out of humor because the President refuses to indorse Seymour and aid his election. Tom has been a hanger-on at the White House for the past two years, and recently secured a nomination for Congress in Philadelphia, expecting the Administration to give him its assistance in "colonizing" voters to secure his election. But report has it that Thomas has been shown the door!

The Democrats were for peace when the country was for war; now the country is at peace they are for war.

In his speech at the Democratic ratification meeting, held in Washington, General Thomas Ewing, Jr., speaking of the threatened revolution, used this sentence: "General Blair at the head of the militia will be a match for General Grant at the head of the regular army." Let him try it, will be the response of every Federal soldier.

Grant a Temperance Man.

The Chicago *Journal* contains "An Hour with Colfax," from which we quote as follows: "Some one alluded to the numerous stories afloat concerning Grant's intemperate habits. Mr. Colfax pronounced them one and all unqualifiedly false. He has not taken even wine for months, and then but once, in company with Sherman and Sheridan, some time since. To show how slight a thing gives rise to a story of large dimensions, he related a recent story and the cause. A gentleman called into Willard's, at Washington, at half past eleven one night, and found General Grant inside the counter. He spoke to Grant, who stared at him, and answered in an indistinct manner, as the man said, saying he was getting some change or something of the sort, and was evidently the worse for liquor. The story got started, and enlarged as it went. 'General Grant has been seen drunk at Willard's on such an evening.' It got to his friends. It troubled them. They broached the subject to the General. These facts were elicited: He was just going on the 9 o'clock cars and was obliged to have the exact change. He found that he had nothing smaller than a $20 bill in his pocket, and stepped into Willard's to get it changed. The clerk was obliged to send a boy out, as the safe was locked, and the regular night clerk was not in. While he was waiting, Grant, as was often his custom, stepped inside the counter. While there, a man came in and spoke to him. 'Are you the clerk, sir?' Grant very naturally stared. 'Are you the clerk, sir?' the man reiterated. 'No, sir,' Grant replied, 'I'm here for change'—and hence the story, without the least foundation."

HYDRAULIC
COW MILKER.

Wanted immediately all who are looking for business to call and examine the HYDRAULIC COW MILKER. "A sure cure for aching hands and kicking cows." It milks the four teats of a cow at once. It imitates the calf, draws and stops drawing to swallow. It will milk any cow dry in three minutes. It is operated by hand, dog, horse, or other power. One man can attend several Machines, milking as many cows at once. It is simple, durable and self-adjusting. Will fit any cow. Milks three teated cows as well as any; easily worked, not liable to get out of order, and has proven in practical use to be more agreeable to the cow than hand milking. A rare opportunity is now offered to enterprising men, either to travel or locate in city or country. Call and examine for yourselves.

POLITICAL.

☞ **REPUBLICAN MEETING.—**

GRANT AND COLFAX.

There will be a Mass Meeting of the Republicans of the

SIXTEENTH WARD,

(Late BLOOMFIELD), FOR THE PURPOSE OF DEDICATING THEIR

NEW WIGWAM,
ON
Saturday Evening, Aug. 8, 1868.

The meeting will be addressed by
H. C. MACKRELL, H. P. MUELLER,
W. C. MORELAND, J. W. POPE.

There will be a BRASS BAND in attendance, and a cordial invitation to be present is tendered to the various Grant and Colfax Clubs of the county.

☞ **REPUBLICAN**
CITY CONVENTION.

The Republicans of the City of Pittsburgh are hereby invited to attend Primary Meetings in their respective wards on

SATURDAY, AUGUST 15, 1868,

Between the hours of 3 and 7 P. M., and there vote for candidates to be placed in nomination for the several city offices, viz:
One person for Mayor of said city.
One person for Controller of said city.
One person for Treasurer of said city.

The voting at said meetings will be by printed or written ballots, containing the names of the candidates voted for, each office on a ticket by itself, and the elections, as far as practicable, will be conducted in accordance with the laws and usages regulating state, county and city elections, the officers taking care to keep a correct list of all persons voting the rest.

The elections will be conducted, wherever it can be done, by the Republican election officers chosen at the last city election, and in wards where no such officers were chosen, the officers to conduct the election have been designated, as hereinafter mentioned by the City Committee.

The Committee suggest that the officers thus designated to hold this election shall voluntarily take the usual affidavit administered to election officers under the laws of the State, so as to shut out all cause of complaint.

The election in the First and Second wards will be held at the Public School Houses in said wards.

In the Third ward at the southeastern corner of Sixth and Smithfield streets.

In the Fourth ward at the Public School House.

In the Fifth ward in the office of the Clerk of the Orphans' Court, at the Court House, under the supervision of A. G. Neeley, George Glass and R. J. Smith, who are appointed the Board to hold said election.

In the Sixth ward at the Public School House.

In the Seventh ward at the Public School House.

In the Eighth ward at the house of Henry Wilson.

In the Ninth ward at the Public School House.

In the Tenth ward at the house of Wm. Brown, at the corner of Penn and Mechanic streets.

In the Eleventh, Twelfth, Thirteenth, Fourteenth, Fifteenth and Seventeenth wards, at the usual places of holding elections in said wards.

In the Sixteenth ward at Gangwisch's Hall, under the supervision of Noah G. Craig, Roland Smith and John C. Stewart.

In the Eighteenth ward at the place of holding elections for what was heretofore known as the 2d precinct of Collins township, under the supervision of David Jones, David Holmes and David Kirk.

In the Nineteenth ward at Joseph Ganster's house, on the Greensburg turnpike, under the supervision of John N. Berlin, Wm. H. Morrison and James Joyce.

In the Twentieth ward at Beltler's School House, under the supervision of Wm. H. Denniston, Geo. F. Rahauser and John B. Rahm.

In the Twenty-first ward at Ross' School House, under the supervision of A. J. Woolslayer, S. B. Ross and B. W. Morgan.

In the Twenty-second ward at Irwin's School House, under the supervision of John R. Murdoch, William Irwin and Randal Morton.

In the Twenty-third ward at the usual place for holding elections in late Peebles township, under the supervision of Joseph Boals, James B. Palmer and James McKibben.

Every supporter of GRANT and COLFAX and the city nominees is earnestly invited to take part in these elections, and all those others, and the election officers are hereby respectfully urged to use all possible diligence to preserve the purity of the ballot-box and secure a fair return of the votes cast.

The election officers, after the votes are counted, will make up duplicate returns thereof, one of which, with the list of voters, shall be placed in the ballot boxes, and the other, taken possession of by the Return Judges, and the Return Judges of the several wards shall present the same at a meeting of Return Judges, to be held at the Common Council Chamber, on TUESDAY, August 18th, at 10 o'clock A. M., when they shall cause the same to be added together, and declare the person receiving the highest vote for each office to be declared the nominee.

The Return Judges, at their meeting, will appoint the City Executive Committee to serve for the ensuing year.

The Committee desires to call the attention of the Election Boards to the following resolution, which was adopted at the last meeting of the Committee:

Resolved, That we recommend to the officers of the Primary Election the enforcement of all legal rules respecting the qualification of voters at general elections, in addition to the requirement that the voter shall be a known member of the Union Republican party.

A resolution was also passed authorizing the Election Boards to fill all vacancies occurring in the offices of their respective districts.

J. A. BUTLER, Chairman.
A. L. PEARSON, Secretary.

☞ FOR CITY TREASURER.

WILLIAM LITTLE,

Of the late Tenth Ward, subject to decision of Republican voters at primary election, on 15th of August.

☞ FOR MAYOR.

JARED M. BRUSH,

Of the old Sixth Ward, is a candidate for Mayor, subject to the decision of the voters at the Republican Primary Election.

☞ FOR CITY TREASURER.

WM. A. TOMLINSON,

Of the Fourth Ward, subject to decision of Republican Voters at election, August 15th.

☞ FOR CITY TREASURER.

SAMUEL ALLINDER,

Is a candidate for City Treasurer, subject to the decision of the voters at the Republican Primary Elections.

☞ FOR CITY TREASURER.

SIGHT DRAFTS ON LONDON

700 MILES

OF THE

UNION PACIFIC RAILROAD

Are now finished and in operation. One hundred and sixty miles of track have been laid this spring, and the work along the whole line between the Atlantic and Pacific States is being pushed forward more rapidly than ever before. More than twenty-thousand men are employed, and it is not impossible that the entire track, from Omaha to Sacramento, will be finished in 1869 instead of 1870. The means provided are ample, and all that energy, men and money can do to secure the completion of this

GREAT NATIONAL WORK,

At the earliest possible day, will be done.

The UNION PACIFIC RAILROAD COMPANY receive:

I.—A GOVERNMENT GRANT of the right of way and all necessary timber and other materials found along the line of its operations.

II.—A GOVERNMENT GRANT of 12,800 acres of land to the mile, taken in alternate sections on each side of its road. This is an absolute donation, and will be a source of large revenue in the future.

III.—THE GOVERNMENT GRANT of United States Thirty-year Bonds, amounting to from $16,000 to $48,000 per mile, according to the difficulties to be surmounted on the various sections to be built. The Government takes a second mortgage as security, and it is expected that not only the interest, but the principal amount may be paid in services rendered by the Company in transporting troops, mails, &c. The interest is now much more than paid in this way, besides securing a great saving in time and money to the Government.

IV.—A GOVERNMENT GRANT of the right to issue its own FIRST MORTGAGE BONDS, to aid in building the road, to the same amount as the U. S. Bonds, issued for the same purpose, and no more. THE GOVERNMENT PERMITS the Trustees for the First Mortgage Bondholders to deliver the Bonds to the Company only as the road is completed, and after it has been examined by United States Commissioners and pronounced to be in all respects a first-class Railroad, laid with a heavy T rail, and completely supplied with depots, stations, turnouts, carshops, locomotives, cars, &c.

V.—A CAPITAL STOCK SUBSCRIPTION from the stockholders, of which *over Eight Million Dollars* have been paid in upon the work already done, and which will be increased as the wants of the Company require.

VI.—NET CASH EARNINGS on its Way Business, that already amount to MORE THAN THE INTEREST on the First Mortgage Bonds. These earnings are no indication of the vast through business that must follow the opening of the line to the Pacific, but they certainly prove that

FIRST MORTGAGE BONDS

Upon such a property, costing nearly three times their amount,

Are Secure Beyond any Contingency.

The Union Pacific Bonds run thirty years, are for $1,000 each, and have coupons attached. They bear annual interest, payable on the first days of January and July at the Company's Office in the City of New York, at the rate of six per cent. in gold. The Principal is payable in gold at maturity. The price is 102, and at the present rate of gold, they pay a liberal income on their cost.

The Company believe that these Bonds, at the present rate, are the cheapest security in the market, and reserve the right to advance the price at any time. Subscriptions will be received in Pittsburgh by

Corner Fourth and Wood streets.

S. McClean & Co.,

And in New York at the

Company's Office, No. 20 Nassau Street,

AND BY

John J. Cisco & Son, Bankers, No. 59 Wall street,

And by the Company's advertised Agents throughout the United States.

Remittances should be made in drafts or other funds par in New York, and the Bonds will be sent free of charge by return express. Parties subscribing through local agents, will look to them for their safe delivery.

A PAMPHLET AND MAP FOR 1868 has just been published by the Company, giving fuller information than is possible in an advertisement, respecting the Progress of the Work, the Resources of the Country traversed by the Road, the Means for Construction, and the Value of the Bonds, which will be sent free on application at the Company's offices or to any of the advertised Agents.

Is Your Disease Rheumatism?

Many persons supposing they are suffering from this disease, have applied Liniments, Plasters and other Rheumatic Remedies without obtaining any relief, when in fact the cause of pain is a derangement of the Kidneys. These are small organs, but very important, and any obstruction or interference with its functions are indicated by pain in the back and loins, languor and weakness, difficulty in voiding and unnatural color of the urine. A Diuretic should at once be resorted to.

DR. SARGENT'S

Diuretic or Backache Pills,

Can be relied upon for these purposes; they have a direct influence on the cells of the kidneys, assists nature in relieving them of any foreign particles, and stimulates them to a healthy and vigorous action.

Dr. Sargent's Backache Pills,

Contain nothing injurious, being composed of entirely vegetable remedies; they do not sicken nor gripe—on the contrary they act as a gentle tonic and restores tone to the system. They are recommended by all who have tried them.

FRIDAY EVENING, August 7, 1868.

The sharp advance in gold and the sudden decline in Erie are the two leading features of the market for the past week. Gold, which under a speculative excitement, touched 150, dropped to 147½, under heavy realizations, and the market takes all that is offered. Parties who were purchasers at about 145 have been realizing, and fresh speculative sales have been made based on what is deemed the too rapid advance of the past few days. It is believed that while there are causes of a commercial character that should give a firmer tone to the premium on gold, and that render a considerable advance before fall probable, yet there is no good reason, other than speculative, which can justify the sudden rise of this week.

—Money continues easy at former rates. There is a hesitation on the part of borrowers to venture in heavy speculations until the future prospects are somewhat less clouded than at present. Call loans at the East on approved collaterals are easily negotiated at 3 ⅌ cent., with exceptional transactions at 2 ⅌ cent. Prime discounts range from 5½@7 ⅌ cent., according to the date of the paper.

—The New York railway share market is weak and irregular, with frequent fluctuations. Erie continues to be the key note of the market. Rumor says that a new party began to buy the stock, and that this entirely reversed the programme of the party which engineered the decline, and hence the sudden upward movement instead of the confidently predicted further decline to much lower figures. Whether Erie will advance or decline from the present point is uncertain, for it depends entirely upon clique manipulation, and outsiders will therefore do well to leave it severely alone. To operate in such a stock is to play against loaded dice and designing swindlers, and the man who either buys or sells Erie might without any more risk stake his money at the faro table. The whole market improved in tone sympathetically; but the warning which Erie has afforded should not be lost upon the holders of speculative stocks in general, and the outside public will do well to leave Wall street to the cliques.

The market to-day has partially recovered from violent excitement, and has been succeeded by a quieter feeling. It is yet, however, in a very unsettled condition.

The following table, made up from dispatches received at J. W. Kennedy's Stock Rooms, Apollo Building, No. 80 Fourth street, shows the prices of Railway Stocks, Gold, &c., at the various sessions of the New York Boards during the day:

[illegible]

—Governments are neglected and drooping. There is a want of confidence in the ultimate result of the "greenback" controversy which causes capitalists to be chary about investing. They suffered a decline of a fraction to-day.

Messrs. Ira B. McVay & Co. report the following quotations of Government bonds in New York to-day, as furnished them by Jay Cooke & Co., their correspondents:

[illegible]

James T. Brady & Co., Bankers, corner of Fourth and Wood streets, furnish the annexed comparative range of prices for government securities:

[illegible]

—An injunction was granted by a Judge of New York, on Thursday last, on the Michigan Southern Company on John S. Prouty's complaint, restraining the company from paying the dividend, and appointing a hearing on Monday next. The plaintiff represents 484 shares of guaranteed stock, and claimed $30,— [illegible] back dividends. The whole scheme is gotten up [illegible] of stock jobbers short of stock, and the lawyers [illegible] the fat pickings made in Rock Island and Erie. The whole amount of cash interest claimed by holders of guaranteed stock is only $108,000, and we would again tell investors who now hold a majority of the stock, that as in the case of the Northwestern Railway, this dividend of 4 per cent. will be paid in cash as advertised, and not to sell their property at a discount for the benefit of speculating courts and lawyers.

—The New York Tribune of Thursday, in its financial article, thus speaks of the break in Erie: The fluctuations of Erie have been quite wide, selling at 56@61½. The lowest price was made early in the day, and as probably all the weak holders are closed out the rally was natural. The losses on the fall came mostly on weak houses and friends of the direction outside the street; but little of the stock has been held for the last year by the larger houses, either on margins or as collateral in loans; it ceased to be accepted by a large class of money lenders at any price since the sale of the last ten millions of stock. The common stock is perfectly worthless, and is very dangerous to sell or buy at present. The management in days past have not scrupled to use the funds of the Company, of which they were Trustees, in stock speculations, and it would be expecting too much of them to refrain from doing so now should the exigencies of the street require it; the receipts of the road are now $35,000 per day, and should a sufficient short interest be made in the stock, the earnings could easily be used to purchase the stock, and give a sharp turn to the shorts. The pay roll could be carried over for one or two months, as has been the case often enough before, and the present holders be enabled to market their stock, after holding it long enough to perpetuate their rule next election. Left alone where it now stands, Erie falls into the hands of parties who have speculated upon the Company for years, and made large fortunes. It is now poor and overburdened with capital; should the stock cease to be called at the Stock Exchange to-morrow it would gradually slink away as did the Atlantic Mail from 96 to 15, and the best thing to do with the stock is to let it alone, and let the present holders bear the loss that eventually will fall upon the holders of the common stock.

PITTSBURGH DRY GOODS MARKET.

OFFICE OF THE PITTSBURGH COMMERCIAL, SATURDAY, August 8, 1868.

Nothing of moment doing in Dry Goods. We only note firm prices for good styles dark prints, which are 14c, although inferior patterns and light colors are offered at from 11½c to 12½c.

We append quotations, which will probably be fully sustained during the season:

PRODUCE AND GENERAL MARKETS.

OFFICE OF THE PITTSBURGH COMMERCIAL, FRIDAY EVENING, August 7, 1868.

Our general markets are gradually improving, but very slowly. Some articles of produce are firmer on account of scarcity, but as a general thing there is a fair supply of all leading commodities to meet the demand. The controlling feature in financial and commercial circles, as a cotemporary remarks, is the continued rise in gold, the result, it is believed, of the uneven foreign trade movement, which, by accumulating a heavy balance against us, has led to the shipment of no less than sixty millions of specie since the beginning of the year. Other considerations—such as the open discussion of qualified repudiation—may have had something to do with putting up gold, but the leading cause, doubtless, is the necessity which the condition of the exchanges would seem to present for so heavy a drain of the precious metals. As the advance wears rather a permanent look, the effect has been to strengthen commercial values, though there has not been much activity or excitement. Trade has improved in some departments, but buyers, as a general remark, do not respond with much alacrity to the enhanced views of holders. The effect of a general advance in prices would, no doubt, be to limit the fall trade. Speculators might, perhaps, be benefited by a return to war prices of gold, but legitimate trade and production could hardly profit by such a course. The supply and demand, as regards foreign commodities, and most kinds of manufactured goods, are pretty evenly balanced, as production in nearly all departments of industry, has learned to wait on consumption, as the only safe and successful policy. The leading agricultural staples are firmer on reduced supplies, and, as foreign orders are for the most part shut out, the export trade is extremely light. The money market continues easy, with a continued gain in the bank deposits. The present plethora is only paralleled by the glut of capital in the leading countries of Europe. The causes operating upon supply and demand in the money market are identical, at home and abroad. Business men prefer to do nothing, rather than run the risk of doing wrong, and hence they allow their money to remain idle in the banks and elsewhere. This is rather a healthy sign than otherwise, when we refer back to its cause; but as action follows reaction, so speculation will follow torpor sooner or later, and history will repeat itself both in Europe and the United States.

Seldom if ever has the progress of the crops in this country been watched with so intense interest by business men and others, as during the present season. The cause of this solicitude is obvious. The prostration of industry and commerce during the last few years has been largely due to short crops—since the resulting high prices have led to dear food, dear labor, curtailed production of manufactures, a decreased export trade, a heavy drain of specie for the liquidation of foreign trade balances, and a long train of concomitant evils. But anxiety, as the New York *Shipping List* remarks, as regards the crops, is rapidly culminating. The harvest of summer cereals, it cannot now be doubted, is a magnificent one, fairly rivaling, if not eclipsing, the fruitful year 1859. The benignant influences of so rich a reward to industrial effort, it would be difficult to over estimate. In due time the commercial depression of the last two years, it may reasonably be expected, will be succeeded by renewed activity, for not only will the chief necessaries of life be cheapened, but they will be more largely consumed and exported, and the means of procuring such articles as come under the denomination of luxuries, being proportionately increased, immense advantages must necessarily accrue first to the trading and laboring classes, and next to the national revenues. In a word, a plentiful harvest is an immeasurable and incomputable benefaction; for, while high prices of grain may give a fictitious prosperity to the agricultural interests, they seriously affect the material prosperity of the country at large.

An Ohio cotemporary ventures the following approximate estimate of the probable yield of the great food staples, compared with the year 1859:

	1859. Bush.	1868. Bush.
Indian corn	838,772,617	1,050,000,000
Wheat	172,643,301	220,000,000
Rye	21,998,000	25,000,000
Barley	15,800,000	20,000,000
Oats	169,000,000	250,000,000
Potatoes	110,580,000	150,000,000
Buckwheat	17,456,000	20,000,000
Aggregate	1,328,694,318	1,695,000,000

If this estimate proves correct, we shall raise three hundred and sixty-six million bushels of breadstuffs more than in the year 1860, the year before the war, and the most favorable year we ever had.

The receipts of leading articles of produce continue light. Since our last we note the following: Flour, [illegible] barrels; apples, 32 barrels; cheese, 384 boxes; corn, 300 sacks; wheat, 1,635 sacks; oats, 562 sacks, and butter, 34 packages.

We quote as follows, which are the current wholesale store prices unless otherwise noted:

BUTTER—There is a steady demand and regular sales of choice at [illegible] ⅌ ℔.

EGGS—Market dull at 18@20c ⅌ dozen.

BACON, LARD, ETC.—There is a good demand and prices are advancing. We quote sugar cured hams at 21½c; shoulders 13@14c; rib sides 16½c; clear sides 17½c; dried beef 23c; lard in tierces 19½c ⅌ ℔, and mess pork ⅌ barrel $30.

LARD OIL—Market firm at $1 45 for extra No. 1, and No. 2 at $1 18 ⅌ gallon.

CHEESE—Market quiet and unchanged. We quote Western Reserve and Hamburg at 13@14c; factory 15@16c, and Switzer at 16@18c ⅌ ℔.

POTATOES—Market dull with a liberal supply. We quote choice at $2 ⅌ barrel.

APPLES—There is a fair demand at $1 50@3 50 ⅌ barrel, as to quality.

SEEDS—Flax seed is in demand at $2; it will bring the same figure in Cincinnati. There appears to be no demand for either timothy or clover seeds.

HAY—Sales at the Allegheny Diamond Market of [illegible] loads at $17 to $20 ⅌ ton, according to quality. Straw was quoted at $25.

MILL FEED—Sales of choice middlings reported at $2 40, and seconds at $1 60.

SALT—The market is dull at $2 in small lots from the store, and to the trade at $1 75.

FLOUR—The flour market continues moderately active and holders firm. There are a great variety of brands of flour on the market and it is difficult to give reliable quotations. From store we quote choice red and winter at $10 75@11 75 ⅌ barrel; choice spring $10 50@11 25 and medium grades $9@10 25 ⅌ barrel. The following are the Pearl Mill prices for fresh ground articles, which quotations are the same for all our mills, viz: Double extra, wholesale in barrels, $11, and retail $11 50; wholesale in sacks by the barrel, $10 70, and retail ⅌ single sack, $2 85; extra family flour, wholesale in barrels, $10 50, and retail $11; wholesale in sacks by the barrel, $10 20 and retail $2 70 ⅌ sack. Rye flour is quoted at $9 25@9 50 ⅌ barrel.

GRAIN.—The transactions in grain are limited and no speculative feeling in any article. The receipts of new wheat are liberal, and prices have been gradually drooping. We quote No. 1 red winter, bought by the mills, at $2@2 10; No. 2 at $1 90@1 95, and No. 1 white wheat at $2 15@2 20 ⅌ bushel. We also learn of the sale of some 11 cars new winter, on private terms. Corn was somewhat excited to-day and a shade higher; prices obtained. Sales of choice from elevator at $1 10 ⅌ bushel, and we heard of one sale reported as high as $1 12 ⅌ bushel. Old oats from elevator sold at 82@83c, and from store at 81@85c ⅌ bushel. New oats are quoted at 60@62c ⅌ bushel. Old rye is in demand at $1 45@1 50, and very little to be had. New rye is quoted at $1 20@1 25 ⅌ bushel, with a fair demand. No movement in barley.

PITTSBURGH OIL TRADE.

OFFICE OF THE PITTSBURGH COMMERCIAL, SATURDAY, August 8, 1868.

Business so far as relates to oil was dull. Buyers were holding off for lower figures, whilst sellers were not inclined to give way. The result was a dull market with limited transactions. The Eastern markets were quoted as follows: Philadelphia—Very quiet. Prime light straw to white, 33c; standard white, spot, 34½c; all August, 34½c; for last half, 34¾@34½c; September, 35@35½c; October, 35@35½c; crude, bulk, 17c; barrels included, 22½c. New York—Market quiet. Sales prime light straw to white, 33½c; standard white, 34¼@34½c; crude, bulk, 15c. Oil City—Holders firm with a fair amount of activity. Sales on the creek at $3 15@3 20. At the mouth, holders asking $5 50@5 55, free on cars.

REFINED OIL—The market was inactive and we could only learn of the following sales: 500 bbls standard white Philadelphia, October, 35c; sales 500 bbls do, August, 34c.

CRUDE OIL—Holders manifest but little disposition to give way; sales 1,000 bbls, August, 14½c; 1,000 do, September, 14½c; sales 1,000 bbls at Venango City, free on cars, $5 40 ⅌ bbl; sales 2,000 bbls, September and October, seller's option, at 14½c.

FRUIT MARKET.

OFFICE OF THE PITTSBURGH COMMERCIAL, SATURDAY, August 8, 1868.

The market for foreign fruits and nuts and canned articles continues very active, as it has been during the whole season. Merchants report a very satisfactory trade. Prices are without material change from those reported two weeks ago. Domestic dried fruits are in better demand, and for peaches prices have been looking up. The stock of green apples is fair and quotations unchanged. The peach crop is not very flattering, and canned peaches are advancing. We quote:

New Layer Raisins, ⅌ box	$4 50 to 4 75	doz	$4 50@5 00
New Figs, ⅌ ℔	18@20c	Dried peaches	14@15c

WEEKLY REVIEW OF THE PIG IRON AND BLOOM MARKET.

OFFICE OF PITTSBURGH COMMERCIAL, SATURDAY, August 8, 1868.

Under continued light receipts and constantly diminishing stocks of forge iron, the demand has been active throughout the week, as at the close all desirable lots of forge irons offering were readily taken. The sales of charcoal forge were unusually large.

In foundry irons there is increased activity, with numerous sales of round lots. The sales foot up as follows: Anthracite, 2,490 tons; Bituminous Coal smelted from Lake Superior ore, 2,775 tons; charcoal, 2,471. Total, 7,736 tons. We are reported the following sales:

IRON AND NAILS.

OFFICE OF THE PITTSBURGH COMMERCIAL, SATURDAY, August 8, 1868.

The demand for iron and nails is limited to present wants, and prices are without material change. The mills are running exclusively on orders, and consequently stocks are not accumulating. Owing to the recent advance in gold there has been considerable inquiry for iron from the east, but manufacturers regard this as a speculative demand, and are refusing to sell at the ruling rates to the western trade.

The stock of sheet iron is inadequate to the demand, and prices are very firm at 5½@5¾c nett cash, for No. 24 common. Nails are selling in one hundred keg lots at $4 50@4 62½ rates nett.

The following are the card rates:

PITTSBURGH COAL MARKET.

OFFICE OF THE PITTSBURGH COMMERCIAL, SATURDAY, August 8, 1868.

Since the close of the war, business in this branch of trade has not assumed a more healthy condition than at the present time. The indications are that there will be a good fall and winter business done, provided the miners and operators, whose interests are mutual, work in harmony together. But very little coal has been laid in by our citizens for fall and winter use, yet all the operators are busy supplying orders from the North, Northwestern and Western markets. Our bituminous coal business outside of the cities by railroad has increased very much in the last year, a brisk and permanent trade having sprung up in Chicago, Cleveland, Erie and other western cities for this coal. Since the opening of the Allegheny Valley Railroad to Oil City, Pittsburgh coal has been able to compete, and now supplies most of that market, and if the Allegheny Valley Railroad had close connections at Oil City by a bridge over the Allegheny river, we have no doubt a very large trade in Pittsburgh coal could be established with Buffalo and New York city by that route.

There will also be a large business done in anthracite coal at this place the coming fall. This coal is fast coming into favor for private use, not only here but in other Western cities. The Pennsylvania and Ohio Anthracite Coal Company (of which Dickson, Stewart & Co., No. 567 Liberty street, are the agents) are now making arrangements to handle 80,000 tons of this coal in this city, some of which will be used here and the balance be taken by barges to Cincinnati, Louisville and St. Louis.

The following are the current quotations for Pittsburgh:

BITUMINOUS COAL.

Family coal (delivered)	10 c
Public buildings (delivered)	9½c
Coal in yard	8 c
Nut coal (delivered)	8 c
Nut coal in yard	6 c
Slack (delivered)	5 c
Coal by car-load delivered at Union Depot, Liberty street	7½c

Prices in Allegheny City 1c per bush higher than the above quotations.

ANTHRACITE.

We quote Lehigh, Shamokin, Mount Carmel and Coal Ridge at $9 ⅌ ton per car-load or in yards, and $9 50@10 ⅌ ton delivered in city, according to distance.

LIVE STOCK MARKETS.

CENTRAL STOCK YARDS, EAST LIBERTY, August 7, 1868.

CATTLE—Owing to the arrival of a single train of eighteen cars of diseased cattle from the Chicago markets in the early part of the week, there has been a regular panic among dealers. Eastern buyers were on hand but nearly all went home without purchasing—fearing to take east any of the stock in the yards. There is a fine collection of beef cattle in the Yards—cattle entirely free from any disease whatever—and most of them in as good order as ever was brought to the market. The disease was entirely confined to the 18 cars, and precautions were at once taken to have the entire number inclosed in an outside lot—separate from the regular pens—and there they either all died, or were killed by order of Meat Inspector Hosick, excepting 140 head which were shipped east to a bone boiling establishment at Communipaw, at the price of $8 ⅌ head.

There has been no other diseased cattle brought to these yards at any time the present season, and this evening the yards are entirely cleared of that lot, and are being renovated with lime and other disinfectants so that consumers of beef can again rest easy. Our authorities have taken precaution to guard against any other importation, and have seen that the diseased (above noted) were safely put in places where there was no danger of their being used as food for man.

We note the following sales:

Holmes & Lafferty sold to J. Rambo 19 head, weighing 16,750 ℔s, at $6 10 ⅌ cwt; also 19 head, weighing 19,600 ℔s at $6 25 ⅌ cwt, and 2, weighing 2,150 at $6 ⅌ cwt.

HOGS—Were more active. Singer & Imhoff purchased 564 head of extra quality, averaging in price $10 25 to $10 90 per cwt. Westley Hodges bought 319 head of a fair quality, averaging from $9 85 to $10 35 per cwt. C. M. Keys bought for the Baltimore market [illegible] per cwt.

SHEEP—The market is nearly bare, there being but few in the pens, and with an active demand prices ruled high for the quality offered. There were only a few lots sold since last report. J. H. Pidcock bought 400 head, in two lots, at an average price of 5c ⅌ ℔. Holmes & Lafferty sold 80 head at $1 12 ⅌ head. Seven hundred head were sold in lots at an average price of $4 75 to $5 50 ⅌ cwt.

New York Dry Goods Market.

NEW YORK, August 7.—Dry Goods—for certain classes if not all woolen goods, there has been a more animated demand, as prices are comparatively low except for novelties, which bring fair prices, but cotton goods are still without much animation, and heavy brown sheetings are ½c lower on some few styles, which have been held at extreme rates; otherwise the market is without decided change, and an active trade is confidently looked for soon.

RIVER NEWS.

THE river continues to fall slowly. The marks last evening indicated three feet six inches. The weather was cloudy and looked like rain.

PARTICULAR NOTICE.—Parties interested will take notice that all lumber, sand and other material now on the Monongahela wharf above the Suspension bridge, must be removed before Monday, August 10th, otherwise they will be removed by the wharfmaster, as the grading and paving will be commenced on that day.

A WELL-KNOWN Pittsburgh steamboatman remarked yesterday, as illustrating the extraordinary dullness of the past year, that but two boats running to and from that port have made enough money to pay their insurance, and for the usual annual coat of paint which every boat requires. One of these two was the Kate Robinson.—*Cincinnati Enquirer.*

The well-known Pittsburgh steamboatman is slightly mistaken. We could name several boats besides the Kate Robinson that have made money. There is no use in making things any worse; they are bad enough, and the boatmen themselves are the only parties responsible for the present condition of affairs. We speak knowingly. There never was a season that freights and Western travel exceeded the present spring. If boats had loaded in turn (the way they will yet have to do) they could have made money, but if steamers are disposed to do business at starvation prices, they must not blame other parties.

THE St. Paul *Dispatch* says the Caffray has dredged good channels on Pig's Eye, Grey Cloud, Beef Slough, and other bars, and besides pulled out over 100 snags.

KEOKUK, August 5.—The departures for St. Louis to-day were the Victory, at 6 A. M., and the Andy Johnson at 7 A. M. The weather continues cool and pleasant. The river is at a stand.

OMAHA, August 5.—The river is stationary. The Guidon, from Fort Benton, passed down last night; the Lewis arrived from below at noon; down at 10 A. M., to-morrow.

THE Vicksburg *Times* fears that the trade between New Orleans and the bends above Vicksburg will be overstocked with first class steamers this season. We have heard of three boats which are to enter this trade when the season opens.

GET A GOOD SAW,

LIPPINCOTT & BAKEWELL
PATENT GROUND
TEMPERED
LIPPINCOTT
WARRANTED
CAST STEEL SAW

And Your Mill will do Good Work

Our Saws are Oil Tempered, Patent Ground, made to Run well.

You will find each Saw of one temper, no hard and soft spots in the same saw.

We accomplish this by our Patent Tempering Process, and you can not get this from any other saw maker, as we own the patents for the United States.

We do not claim to make a cheaper Saw than any one else, but one that will run at the word go, and will give no trouble, and will keep round longer; because being uniform with temper, it will not wear on one side faster than the other.

We invite correspondence, or an interview with the practical man of your firm.

J. N. SNOWDON,

MACHINIST,

ENGINE BUILDER

AND

STEAMBOAT CONTRACTOR.

Having Leased the well-known Works formerly carried on by John Snowdon & Sons, and possessing ample facilities for completing contracts in the above line, I am now prepared to engage for work to be done on the best terms and in the shortest time possible. I propose to BUILD STEAMBOATS ENTIRE or furnish any part of the Machinery. I would especially ask attention to my facilities for, and experience in, the construction of

IRON VESSELS.

For which I am prepared to contract.

Refer to the manufacturers and business men of Pittsburgh generally.
